

## **GARDENING HINTS FROM THE PRO**

*Sherri Harrah from Plants for All Seasons on SH 249*

### **March 2019 To-Do List**

- Get cool-season crops and tomatoes into the garden now!!!! Don't wait—soon the weather will be too hot for them. Have row covers or homemade wind breaks handy to protect plants on chilly nights.
- Early this month, sow the last plantings of spinach, turnips, mustard, beets, carrots, and broccoli.
- In mid-to late March, plant corn, squash, peppers, and cucumbers. Nourish young plants with liquid organic fertilizer.
- Pull mulch away from perennials, shrubs, and trees to allow the soil to warm around them.
- Feed everything with the pink label Micro-Life.
- Fertilize the lawn with Micro-Life Hybrid Fertilizer!!!
- Apply MicroLife Humates plus and a soil activator like Medina plus. This will help naturally aerate, dethatch, and help with water retention come Summer, and build soil microbes to fight fungus naturally!!! **This is also how we remediate the soil compaction from all the rain!!**
- Buy caladiums now!!! There are many exciting new varieties that have been introduced this year.
- Check out the new addition at Plants for all Seasons! We are super excited to offer terrium plants and supplies, indoor plants, MORE SEEDS and BULBS than ever before, and a bigger selection of garden flags.

Get Your **Green** On!
