

GARDENING HINTS FROM THE PRO

Sherri Harrah from Plants for All Seasons on SH 249

March To-Do List

Garden Hints

- Get cool-season crops and tomatoes into the garden now!!!! Don't wait—soon the weather will be too hot for them. Have [row covers](#) or homemade wind breaks handy to protect plants on chilly nights.
- Early this month, sow the last plantings of spinach, turnips, mustard, beets, carrots, and broccoli.
- In mid-to late March, plant corn, squash, peppers, and cucumbers. Nourish young plants with liquid organic fertilizer.
- Pull mulch away from perennials, shrubs, and trees to allow the soil to warm around them.
- Feed everything with the pink label Micro-Life.
- Fertilize the lawn with Micro-Life Hybrid Fertilizer!!!
- Apply MicroLife Humates plus and a soil activator like Medina plus. This will help naturally aerate, dethatch, and help with water retention come Summer, and build soil microbes to fight fungus naturally!!! **This is also how we remediate the soil compaction from all the rain!!**
- Buy caladiums now!!! There are many exciting new varieties that have been introduced this year.
- Check out the new addition at Plants for all Seasons! We are super excited to offer terrrium plants and supplies, indoor plants, MORE SEEDS and BULBS than ever before, and a bigger selection of garden flags.

Get Your **Green** On!
